05 November  Opening of WHAM Art Exhibition/ Technology Exhibition
06 November  Classes finish
06 November  VET Graduation
07 November  Final Assembly
10 – 20 November  TQA Examinations

FROM THE PRINCIPAL

“Believe you can and you’re halfway there”

Theodore Roosevelt

From discussions with other parents and as a parent of a year 11 student myself, I am aware of how challenging it can be to support your son/daughter as they complete Year 11 or 12. With more emphasis being placed on achieving good results, students are feeling under pressure to achieve and can find the coming weeks stressful.

We hear students express a mixture of emotions: fear of not doing as well as they hope, excitement about the future, anxiety about assessment processes such as exams or overconfidence due to a lack of understanding of the demands of this time of year. As a parent, just letting them know you are there to listen, support and love them no matter what, is a great starting point to help them get through these coming weeks.

As you are aware, we have strong support services here for students. Our Student Services staff are available to help your son or daughter and teachers are always available for extra tutorials. Some helpful tips are also listed in the Elevate link here.

You can also find some useful tips young people have made up for college students to help them through this challenging time here.

Principal

SCIENCE FOR THE FAMILY

Students’ families were invited to participate in practical Science lessons recently. Parents, grandparents, siblings and family friends worked closely with students on experiments on chemical equilibrium and conservation of momentum, in Chemistry and Physical Sciences respectively. It was an enjoyable experience for all. The visitors left with an insight into teaching and learning and students took pride in displaying the skills and knowledge developed over the year.
